Analysis Report:

This Arrangement implies that it can **eventually transform the misfortune into blessing**

Firstly, **the missing dog cannot be found NOW**. The color of the dog is **yellow**, and the woman will buy a **new dog** if she cannot find the missing dog now

Secondly, the **information about the missing dog will come out in October or November** within the year. The woman or her family would accidentally get the information about the missing dog from the **restaurant or grocery which used to deliver soup or milk to the dog owner**; The restaurant or grocery can only offer the information or clue about the dog, but they are not able to help find the dog in person

Finally, **The woman can eventually get her missing dog back** but **would need to pay some cash to** someone who can help conditionally. We can guess **the owner would eventually pay EUR 350 to purchase her missing dog**. Based on the calculation of Heluo Numerology, The estimated price to purchase her dog back can be EUR 35, EUR 350 or EUR 3,500. However, EUR 3,500 is more than the maximum price the woman is willing to pay while EUR 35 is unreasonable. Therefore, the estimated reasonable price to purchase back her missing dog is EUR 350
